PRODUCT INFORMATION

ULTILADDER

The ULTILadder rear door ladder is designed to allow access to the roof of the van, enabling loads to be securely fastened into position without unnecessary strain.

The ULTILadder has been designed by expert engineers who have studied the different makes and models of vans on the marketplace to create rear door ladders that are bespoke to the van. An upgrade to our current rear door ladder offering, the new brackets have been redesigned to sit in line with the curvature of the rear door to ensure a flush and perfect fit. Manufactured from steel, the brackets are heavy duty and ensure the ladders can hold a weight of 140kg.

Constructed from lightweight yet robust Anodised Aluminium, the ULTILadder offers an extremely heavy duty and hard-wearing solution. With the handrails powder coated in a black finish, the powder coat provides anti-corrosive properties to prevent rust, whilst also giving the ULTILadder a sleek and modern look.

WHY CHOOSE VAN GUARD ACCESSORIES?

45+ years in British manufacturing

Customer Service support

In-house design and manufacturing

Next working day delivery available

A HEAVY DUTY AND HARD-WEARING SOLUTION TO EASILY ACCESS THE ROOF OF THE VAN

The ULTILadder comes pre-assembled, which means all that is required is the attachment to the vehicle.

With an assembly time of only 20 minutes and vehicle specific detailed fitting instructions, it couldn't be easier to attach to the van.

Combining both strength and style, the ULTILadder provides a modern solution for easily accessing the roof of the van.

DIFFERENT LENGTH LADDERS AVAILABLE DEPENDING ON HEIGHT OF VAN

The ULTILadder is available in 5, 6, and 7 step configurations, with bespoke fitting brackets for most major van models on the market.
